Hi Dave,

We have been making some progress on our revisions to our Industrial and Agricultural standards (Classes 3 and 4 in Minn. R. 7050), and have been doing a lot of thinking about the comments we received from Region 5 during our 2016 request for comments. Specifically, we've recently been wrestling with the comment regarding numeric interpretation of the narrative standard to protect Class 2 (aquatic life) uses for the parameters that may be removed and replaced with a narrative standard, or those that may have limited applicability, rather than being applicable to all waters of the State.

Bill Cole and I were hoping that we could get some of your time to discuss our thinking on this, just to get your informal thoughts at this stage, and hopefully to help clarify our thinking so that we can move forward. If you (and anyone else that might be beneficial to the discussion) would be willing to take some time to chat with us, we would greatly appreciate it. We were hoping to be able to share a screen – do you have the capability to connect with Skype?

I'll propose some times out in the future that we have availability, and if you want to just get back to me with a time that would work for you (and whoever else you might want to include), I'll get something scheduled. If nothing works, let me know, and we'll look further out!

Times we have open:

July 2 at 10:00

July 11 at 3:00

July 13 any time between 9:30 and 3

July 17 2:00 to 4:00

July 18 8:00 to 10:00

July 19 8:00 to 10:00 and 1:00 to 4:00

Thanks,

Laura
